

## Team Involvement in Demonstration

|                      |              |
|----------------------|--------------|
| <b>Date</b>          | 3 July 2026  |
| <b>Team ID</b>       | XXXXXX       |
| <b>Project Name</b>  | Smart Lender |
| <b>Maximum Marks</b> | 1 Mark       |

### Team Involvement in Demonstration:

| S.No | Team Member Name          | Role in Demo                  | Section Presented                                         | Contribution Summary                                                                                                                                | Participation (Active / Passive) |
|------|---------------------------|-------------------------------|-----------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|
| 1    | Chekuri Devi              | Data Analysis & Preprocessing | Dataset Collection, Importing Dataset, Data Preprocessing | Explained dataset collection, data import, preprocessing, handling missing values, and data preparation for model training.                         | Active                           |
| 2    | Jeeru Mitravardhan        | Machine Learning Developer    | Exploratory Data Analysis (EDA), XGBoost Model            | Presented univariate and multivariate analysis, feature scaling, XGBoost model building, and explained why XGBoost was selected as the final model. | Active                           |
| 3    | Ganthala Rohith           | Model Evaluation & Deployment | Train-Test Split, Model Evaluation, Model Saving          | Explained dataset splitting, model evaluation metrics, saving the trained model, and deployment overview.                                           | Active                           |
| 4    | Yelugubanti Satya Bhavani | Application Developer         | Flask Web Application                                     | Demonstrated the Flask application, HTML interface, real-time loan prediction, and Data Analysis.                                                   | Active                           |
| 5    | Pilli Siva Sankar         | Tester /Developer             | Application Testing and Developing                        | Demonstrate prediction results using different applicant inputs, Model development, and verified application functionality.                         | Active                           |

|   |             |                                   |                     |                                                                                                                                      |        |
|---|-------------|-----------------------------------|---------------------|--------------------------------------------------------------------------------------------------------------------------------------|--------|
| 6 | Entire Team | Project<br>Demonstration &<br>Q&A | Final Demonstration | Demonstrated the complete Smart Lender application, answered evaluator questions, and explained future enhancements and scalability. | Active |
|---|-------------|-----------------------------------|---------------------|--------------------------------------------------------------------------------------------------------------------------------------|--------|

#### Team Coordination Notes:

| Aspect                                 | Details                                                                                                                                                                  |
|----------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Team Leader / Coordinator              | Jeeru Mitravardhan                                                                                                                                                       |
| Overall Team Coordination Rating (1-5) | 5/5                                                                                                                                                                      |
| Any issues during demo                 | Minor issues related to application startup and model file loading were encountered during initial testing.                                                              |
| How issues were resolved               | The team verified file paths, checked dependencies, and coordinated effectively to resolve the issues before the final demonstration, ensuring smooth project execution. |
